Departement of geography
going to organize program on
Save Energy (Guest Lecture) on Date..29/01/24....
you are all requested to attend
the program.

Departement of geography

Energy Conservation (save energy)

* Aims and objectives

On 13 march geography department conducted an special guest lecture on Energy conservation our special guest lecturer is B.S Rajput

- By this guest lecture student to know about energy Conservation Issue.

energy Conservation is the effort to reduce wasteful energy consumption by using fewer energy services this can be done by using energy more effectively

(Using less energy for continuous service or changing one's behavior to use less services)

- Energy Conservation also plays an important role in addressing climate change by lowering overall green house emission

Outcome of the programme

- students by attending this lecture get to know the basic ways to save energy and how energy conservation is important for our future generation too

- student get increased awareness about save energy

Energy conservation is a process of reducing the demands for energy and enable the energy supply to begin to rebuild itself.

Energy needs to be conserved to cut costs and to preserve the resources for longer use.

Save energy lecture
